

10 February 1983

MEMORANDUM FOR: Deputy Director for Administration

FROM: Daniel C. King
Director of Logistics

SUBJECT: Report of Significant Logistics Activities for
Period Ending 10 February 1983

1. Progress Report on Tasks Assigned by the DCI/DDCI:

No tasks assigned during this reporting period.

2. Items or Events of Major Interest that have Occurred During the Preceding Week:

a. DDI Support: With the installation of the two APS-Micro 5 Phototypesetters in room GJ-56 at Headquarters, the Office of Current Production and Analytic Support, Current Support Group (O/CPAS/CSG) is accelerating plans to produce the National Intelligence Daily (NID) in a typeset format via ETECS. This new system will replace the present product which is produced on NBI and IBM Mag Card typewriters. In anticipation of full conversion to ETECS, plans are also underway to locate ETECS terminals and printers in the Operations Center for on-line use to input and edit articles for the NID.

b. National Intelligence Council (NIC) Support: The ETECS Mini-Edit System is currently being used for production of most National Intelligence Estimate (NIE) drafts in support of the NIC. Volume is increasing for this requirement, and the Office of Logistics' (OL) Printing and Photography Division is investigating the possibility of relocating a high speed data printer to the seventh floor at Headquarters. This equipment will support the draft production Diablo printers currently in place, but which are susceptible to frequent breakdowns due to their heavy use.
